PROJECT OUTLINE (REMODEL/ADDITION)

BRIEF INTRO: Located in the hills of Claremont in the Claraboya Community, this single story residence has an existing in-ground pool and spa, 3 bedrooms and 2 bathrooms with fireplace all on single level. Built in 1968, the existing 2,346 square feet of living area with the 675 s.f. for an 2-car attached garage makes up the existing structure and site prior to proposed modification.

PROPOSED: The 494 sf addition involves work to existing residence and garage. The new layout maintains the same 3 bedrooms/2 baths as have added an exercise room by enclosing the inside entry courtyard cover for this 340 sf thus added to dwelling space, The kitchen was expanded for 154 sf that which encroaches into a portion of the existing enclosed garage (the oversized garage thus reduces to 521 sf from 675 sf) inwhich all work for both the kitchen and exercise room expansion falls within the existing covered enclosed roof structure. The building frontage is reclad where the only structural alteration for the roof is at the entrance canopy.

General building scope includes replacing all windows and doors plus remodel adjacent rooms impacting where expansion occurs. The exterior finishes are either repainted or clad for newly consistent appearance. Other than the remodeling mentioned above, the remaining portions of the building will hold the integrity to existing structure.

All work outside the building is minimal with no grading. Site work includes removing some palm trees and replanting disturbed areas for work and reworking entrance landing portions.

Contractor shall exercise the responsibility with architect in securing latest approved drwgs. prior to actually executing work

Located at 2784 Via Sinaloa

The Community Development Department has reviewed and approved your request for an Architectural Staff Review (AS) to allow additions and remodel to the west, or front façade, of the existing single-family residence located at the above-referenced property. Specifically, this approval is for a total of 494 square feet of additions and 280 square feet of remodel to the existing residence and attached garage. The additions, remodel, and re-landscaping include the following:

- Infill of an existing atrium/interior courtyard cover for an enclosed entry and exercise room of 340 square feet;
- Expansion of an existing kitchen by encroaching into an existing garage (from 675 square feet to 521 square feet) for a new laundry room;
- Remodel of the building frontage, which includes the replacement of all windows and doors and repainted or re-clad exterior finishes;
- Re-landscaping of existing front lawn, approximately 1,700 square feet, for a more native (non-invasive) and drought tolerant landscape.

The proposed additions and remodel have been designed to be consistent with the design of the existing residence in terms of windows, doors, and finishes. It also remains consistent with the surrounding residences in the Claraboya neighborhood.
